

Quarter 2 (Apr/May/Jun) 2010 – Summary*

During the second calendar quarter (Q2) of 2010, the Ministry of Agriculture and Lands (BCMAL) Fish Health staff visited 25 of the 69 active marine salmon farms to conduct Health Management Plan (HMP) compliance assessments. All farms were found to be compliant with their corporate HMPs.

Fish Health and Lice Monitoring audits by BCMAL ceased as of April 01, 2010 when live fish and carcasses were no longer volunteered, or made available, to BCMAL Fish Health Program staff.

The industry's BCSFA Fish Health Event (FHE) and Mortality reports are, as required, regularly submitted to BCMAL. These quarterly reports are posted to BCMAL's [Fish Health website](#).

** This quarterly report information, although timely, should be considered preliminary until a corresponding annual report is published.*
